### **Brief Description of Course**

This course studies individualism and creativity in central Italian Mannerist and Baroque art, circa 1520-1680. It begins with the subjective anti-classical early Mannerist style which emerged after the High Renaissance. The reasons for the development of this style--in our century viewed as prophetic of modern art--will be examined from the political and religious crises of the 1520's to the simple aesthetic problem of "where do you go from perfection". The elegant and lavish later phase of Mannerist art, here associated with the court of the Medici grand dukes, will also be considered and the ambitious architectural projects and decorative campaigns sponsored by the Medici and their entourage will be studied, as well as the crafts which they supported and stimulated. The second part of the course covers the Baroque, beginning with the sometimes brutally realistic early Baroque as it developed in reaction to the artificiality of late Mannerism, particularly in Rome and Bologna. The course concludes with the High Baroque where the focus is Rome--the place where this style arose largely through the genius of Bernini and the patronage of a newly confident Catholic Church; the Florentine repercussions of Roman Baroque developments both in church and palace decoration will however also be brought in. Site visits in Florence and its vicinity are an important part of the course. Site visits to Bologna and to Rome are also course requirements. Among the artists studied are Pontormo, Rosso Fiorentino, Parmigianino, Giulio Romano, Bronzino, Cellini, Giambologna, the Carracci, Caravaggio, Artemisia Gentileschi, Bernini, Borromini, and Pietro da Cortona.
