1 – COURSE DESCRIPTION

This course gives a broad overview of Italian operatic history. As a cultural form of art, opera has not only been influenced by its social and political environment but it has also contributed to the shaping of its cultural context reflecting - directly or in more subtle ways - through its characters, amorous intrigues, dramatic tension, mystery of sexuality and spectacle, the complexity and the ambiguity of the tastes of the public of each different era.

CSU GE category: C3, C4 or C ELECTIVE

Instructor's Note : The course gives a broad overview of Italian Operatic History, and through a interdisciplinary approach (musical, theatrical, literary, sociological and historical) will develop the knowledge of the ways in which opera and performance styles in opera have changed over time.

Tracing its origins back to the late sixteenth century 'Camerata' in Florence (which led to the first music dramas of Claudio Monteverdi), the course explores the history of Italian opera through a chronological selection of representative works from the 17th to the 20th centuries.

No prior musical background (technical) or historical knowledge of music is required. The topic is not geared only towards lovers of classical music and opera goers. It investigates the complexity and the ambiguity of women's voices and bodies, how some Italian operas and certain voices have the capacity to provoke admiration, rapture, identification even in the younger generation (the transposition of *Bohème* into the musical *Rent* and *Madam Butterfly* into *Miss Saigon* are typical, wonderful examples).

It illuminates also mysteries of sexuality, fandom, obsessions, history, performances, recordings, extravagant gestures, and divas. It explores the power of Italian opera to capture the fluidity of sexuality through voices that transcend the prescription of gender, reflecting at the same time the new American musicology's trend for new interdisciplinary approaches for the study of the human voice and opera theatre, and the interests of the young generations for phenomena such as the Drag Queens - whose origin has to be seen in the Castratos and *Primadonnas* roles en travesty- and for the transvestism-masquerading phenomena of the 21th century productions.

Other topics include: the technical issues of opera production, the role of singers and the relationship between the composer and the playwright or librettist, the heroine's role in opera examined as a reflection of the culture, religion, society, and literature over the centuries.

Classes include lectures, class discussions, excerpts of recorded material and videotapes.

Selected works include: Monteverdi's *Incoronazione di Poppea*, Mozart's *Le Nozze di Figaro*, Rossini's *Il Barbiere di Siviglia*, Bellini's *La Sonnambula*, Donizetti's *Don Pasquale*, Verdi's *Rigoletto* and Puccini's *Bohème*.
