But it is in Italy, in the fifteenth century, that the interest of the Renaissance mainly lies - in that solemn fifteenth century which can hardly be studied too much.

COURSE DESCRIPTION

This course explores the historical, literary and cultural developments of one of the most remarkable and vibrant periods of Italian history: the Renaissance. Students will be introduced to the main historical developments of the Renaissance period from the late fourteenth century to the end of the sixteenth century. The Renaissance is above all the age of the individual and the affirmation of his/her achievements, best summed up by the credo "Man – the measure of all things". The focus of this course is therefore upon great personalities of the Italian Renaissance mainly in the fields of the visual arts, literature and philosophy, but also drawn from those of politics and civic life. These include key figures of the most prominent Italian families: the Medici, the Sforza, the Della Rovere; artists and architects: Brunelleschi, Leon Battista Alberti, Leonardo da Vinci, Michelangelo; writers, poets and philosophers: Dante, Petrarca, Boccaccio, Pico della Mirandola, Machiavelli, as well as merchants and bankers. All these individuals left their mark in Italy between the early 1400s and the late 1500s.

This course explores the historical, literary and cultural developments of one of the most remarkable and vibrant periods of Italian history: the Renaissance. To actually study this movement, which so profoundly shaped Western culture, in the city of its birth, offers students the unique opportunity of experiencing at first hand the achievements of that age. On-site visits are therefore an integral part of this course.

CSU GE category: D5

General Course Requirements

You are responsible for the weekly readings, the information given to you in class, on handouts **and via email**. Part of your grade will be determined by regular attendance, participation in class discussions and active engagement in all activities of this course. ***Make sure to check your email on a regular basis for updates and additional information.***

LEARNING OBJECTIVES, GOALS and OUTCOMES

The main aim of the course is to teach students, through an extensive analysis of historical data and literary and artistic achievements, how to recognize and appreciate in detail one single period in the development of Italian arts, literature, history and culture - as it emerged in its birthplace – Florence – and as it developed in other parts of Italy.

Through the observation and analysis of “samples” of masterpieces of the intellectual and artistic achievements of the period, students will come to understand a large portion of the Renaissance and will be able to relate the

historical background to literature, the fine arts, philosophy and politics.

By the end of the course, students should be able to demonstrate:

- a confident knowledge of the main historical events and personalities which shaped the Italian Renaissance
- a critical approach and active observational skills towards the many aspects analyzed in the course.
- an ability to synthesize information from a range of primary sources in both oral and written form
- a capacity to construct a relevant and analytical response to an historical question
- self-management skills.

PREREQUISITES – NONE REQUIRED

- The course is open to advanced, intermediate and beginner students of the topic. Although a background in European history would be helpful, it is not a prerequisite of the course. All topics will be analyzed without presumption of foreknowledge.
- The class is in English, but the terminology used will sometimes be in Italian when a translation is not appropriate.

METHOD

The course will be structured in lectures, in-class discussions and on-site visits to key museums, galleries, churches and palaces.

ASSESSMENT/GRADING

Students are asked to take careful notes during every lecture, presentation and in class activity:

they are to be considered a fundamental didactic base for the whole course. Large space will be left to in-class guided discussions and to the student's presentations on various topics.

Because the lectures tend to be interactive and a discussion will follow to some lecture, students will have many opportunities to show that they have done the assigned readings.

Assigned readings must be done before each class and form the basis for class discussions; students will not be immediately graded on their comments in class, but the reading will certainly improve their performance in the exams and failure to do any reading for class will certainly damage their grade because they will not be able to do well in the quizzes.

Grades will be calculated on the basis of class participation (10%), mid-term Exam (identifications, short answers) (30%), Final Exam (30%), Final Paper (30%)

Students are required to write one term paper. The deadline for the paper is the week of Feb 6-8, on the day of the final exam. To be announced. Length requirement for paper: 6/7 pages (i.e.2000 words), typed (font Arial, size 12,double spaced). Hard copies typed in standard format are to be handed in to the professor and an electronic copy is to be submitted by e-mail (when required).

Participation means active engagement in the course; being consistently prepared for class (having really read that day's assignments) asking questions, responding to questions: offering your own insights and opinions: attentive listening to others.

EXAMS

The Mid term exam (identifications, short answers) will take place on **April 8, at 6 P.M.** Class will be held as usual on Mon., April 6.

The Final Exam will take place between **May 25 - 28** . Exact day and time to be announced.

Should issues of academic dishonesty arise (plagiarism and so on), the teacher will refer to the CSU written policy on such matters.

Remember that the dates of the exams can NOT be changed for any reason, so please organize your personal schedule accordingly.
